MEMORANDUM

Date: Monday, August 25, 2014

To: Domenic Lanzillotti, Town of Arlington Purchasing

From: Wayne Chouinard, Town Engineer

RE: Traffic Signal Equipment Upgrades: Bid #14-31

The following is a list of information pertaining to the Traffic Signal Equipment Upgrade Bid #14-31. These items were identified at the pre-bid meeting held on August 20, 2014 and the necessary response for information is as follows:

1. The information pertaining to the Time of Day Schedule indicated on the plan shall supersede the specifications listed on page 20 of the Specifications Packet.
2. The Audible Pedestrian Indication specified on the "List of Major Items Required" on the plan is intended to provide an audible locating tone for an Accessible Pedestrian Station and also provide an tone or message to accompany a vibro-tactile indication during the visible walk display. The unit shall be an "Advisor Guide Accessible Station (AGPS)" by Campbell Company or equivalent.
3. The Pedestrian Signal Heads requirements listed on page 31 of the Specification Packet shall supersede the plan information.
4. The upgrade of the signal head to accommodate a green and yellow arrow turn arrow shall be allowable as a retrofit of the required lense rather than the entire signal head. A retrofit of the lense shall include all incidental wiring necessary to provide the required functionality.
5. The following item shall be included on page 9 of the Submittal Packet. Section G shall include an additional item #6 and indicate:
 - a) All Signage included
6. It shall be noted that intersection re-cabling may be required to provide the proper functionality of the signal operation. Any re-cabling shall be incidental to the installation of the pre-emption units.

The previous clarifications and responses for request for information are now part of the administrative record.
